

Refugee Health Workshop

15-18 March 2018 and 14-15 April 2018

Medizinisches Lehrgebäude, Elsässer Straße 2-o, 79110 Freiburg

The Refugee Health Workshop is an interdisciplinary course for students from the University of Freiburg and Evangelischen Hochschule; involving students from Medicine (for the clinical section), Master in Global Urban Health, Social Work, as well as European Ethnology. Throughout the 6-day workshop, the clinical, economic and political aspects of health care for refugees will be discussed, in addition to various methodological approaches to research on the health care of refugees.

What will the students learn?

- Medical care of refugees in areas of infectious diseases, paediatrics and psychosomatics
- Quantitative and qualitative methodological aspects of research and evaluation in the health care of refugees
- Political, economic and social framework of health care for refugees
- Creating and presenting your own project outline in an interdisciplinary small group

To register, please contact Dr Berit Lange: berit.lange@uniklinik-freiburg.de
